DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, 25-27, drawn to an image processing apparatus and method for obtaining processed image data by carrying out tone correction processing on image data obtained by a digital camera, classified in class 348, subclass 223.1.
 - II. Claims 16-24, drawn to a tone conversion table generation method for generating tone conversion tables used at the time of obtaining processed image data obtained by a digital camera, classified in class 382, subclass 274.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the omission of details concerning a tone conversion table generation method for generating tone conversion tables used at the time of obtaining processed image data by carrying out tone conversion processing on image data obtained by a digital camera is evidence that the patentability of the combination does not rely on the details of the tone conversion table generation method of the specific subcombination. The subcombination has separate utility such

as generating tone conversion tables for using in processing image data obtained by a digital camera.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to LUONG T NGUYEN whose telephone number is (703) 308-9297 or (571) 272-7315. The examiner can normally be reached on 7:30AM - 5:00PM.
